

Learn Citaville Institute - Brochure

Basic Kids Coding Class

About the Course Program

This beginner-friendly program introduces children to the exciting world of coding. Through fun, interactive lessons, kids will learn problem-solving, logical thinking, and creativity by building simple games and projects.

Delivery: Virtual (100% online, instructor-led, project-based) — learn at your own pace

Certification Requirement: Completion of projects and minimum attendance. Earn a minimum passing grade of 70% in each Course Topic assessment

Common Career Paths: Most Technology and Business industry

Recommended Study Time: Minimum of an hour personal daily study time during week days and 5 - 6 hours intensive training during weekend

Program Duration: 4 weeks

Who Can Attend?

This program is designed for:

- Children aged 6–14 with an interest in computers and technology
- Schools and parents seeking to introduce coding to kids

Pre-requisites

- No prior knowledge required
- Basic ability to use a computer

Detailed Course Overview and Topics

- **Module 1: Introduction to Programming Concepts:** Use simple block-based programming tools to learn about sequences and loops.
- **Module 2: Creating Games and Stories:** Hands-on activities to create simple animations, games, and interactive stories.
- **Module 3: Problem Solving with Code:** Work through fun challenges to develop computational thinking and problem-solving skills.
- **Module 4: Practical Project - A Simple Game:** Students will build a simple game from scratch to demonstrate their understanding of coding concepts.

On Completion of this Course, You'll Walk Away With:

1

Kids will gain a foundation in programming logic, creativity, and problem-solving skills, sparking early interest in computer science

2

Basic computational thinking and a completed simple game.
