CompTIA A+

About the Course Program

This course prepares learners for the globally recognized CompTIA A+ certification. It provides foundational IT knowledge in hardware, networking, troubleshooting, and security, equipping participants for entry-level IT support roles.

Delivery: Virtual (100% online, instructor-led, project-based) — learn at your own pace

Certification Requirement: Completion of projects and minimum attendance. Earn a minimum passing grade of 70% in each Course Topic assessment

Common Career Paths:

Recommended Study Time: Minimum of an hour personal daily study time during week days and 5 - 6 hours intensive training during weekend

Program Duration: 4 weeks

Who Can Attend?

This program is designed for:

- Aspiring IT support professionals
- Students pursuing CompTIA certifications
- Business professionals interested in IT foundations

Pre-requisites

- None required; Basic computer knowledge is recommended

Detailed Course Overview and Topics

- **Module 1: Hardware:** Hands-on practice with installing and configuring motherboards, CPUs, memory, and storage devices.
- **Module 2: Networking:** Learn to compare network types, hardware, and configure network addressing and internet connections.
- **Module 3: Mobile Devices & Printers:** Practice setting up and troubleshooting mobile devices and printers.
- **Module 4: Operating Systems:** Learn to configure and manage different operating systems, including Windows, Linux, and macOS.
- **Module 5: Security:** Hands-on labs to configure security settings for workstations and SOHO networks.
- **Module 6: Troubleshooting & Operational Procedures:** Apply troubleshooting methodologies and learn about data handling best practices and scripting basics.

On Completion of this Course, You'll Walk Away With:

1

Participants will have the foundational IT skills needed for entry-level support roles and be prepared to attempt the CompTIA A+ certification exam.

2

Readiness for CompTIA A+ certification and hands-on support skills.
