Desktop Publishing & Microsoft Office: Basic Computer Operation

About the Course Program

This course introduces learners to essential computer operations, desktop publishing, and Microsoft Office tools. It equips beginners with practical skills for academic, personal, and professional use.

Delivery: Virtual (100% online, instructor-led, project-based) — learn at your own pace

Certification Requirement: Completion of projects and minimum attendance. Earn a minimum passing grade of 70% in each Course Topic assessment

Common Career Paths:

Recommended Study Time: Minimum of an hour personal daily study time during week days and 5 - 6 hours intensive training during weekend

Program Duration: 4 weeks

Who Can Attend?

This program is designed for:

- Beginners new to computers
- Students, job seekers, and office staff
- Entrepreneurs and small business owners

Pre-requisites

- No prior experience required

Detailed Course Overview and Topics

- **Module 1: Computer & OS Fundamentals:** Learn the basic parts of a computer (hardware and software). Navigate an operating system (Windows) and understand file management. Practice basic operations like setting up a Wi-Fi network and troubleshooting common issues.
- **Module 2: Microsoft Office - Word:** Master creating, editing, and formatting text documents. Learn to insert tables, images, and other objects. Practice using advanced features like mail merge, headers, and footers.
- **Module 3: Microsoft Office - Excel:** Get hands-on with spreadsheet basics. Learn to use formulas and functions to perform calculations. Practice creating charts and graphs to represent data.
- **Module 4: Microsoft Office - PowerPoint:** Create and design engaging presentations. Learn to insert images, shapes, and multimedia. Apply animations and transitions to make your presentations dynamic.
- **Module 5: Desktop Publishing:** Learn the principles of graphic design and page layout. Use desktop publishing software to create brochures, posters, and newsletters. Practice manipulating images and using typography effectively.
- **Module 6: Internet & Communication:** Understand how to use a web browser to search for information. Learn about online safety and how to use email and other communication platforms.

- **Module 7: Capstone Project:** Design and create a complete document package for a small business, including a letterhead, brochure, and a short presentation, to demonstrate all the skills you've learned.

On Completion of this Course, You'll Walk Away With:

1

Participants will gain the skills needed to confidently operate a computer, use Microsoft Office applications, and design simple desktop publishing projects.

2

Confident use of MS Office and an assembled capstone document package.
