

Learn Citaville Institute - Brochure

Fullstack Web Development (ReactJS, NextJS, NodeJS)

About the Course Program

This intensive course provides comprehensive training in fullstack web development. Students will learn frontend development using ReactJS and NextJS, backend development using NodeJS, and how to integrate both into scalable applications. By the end of the course, learners will have built and deployed fullstack projects.

Delivery: Virtual (100% online, instructor-led, project-based) — learn at your own pace

Certification Requirement: Completion of projects and minimum attendance. Earn a minimum passing grade of 70% in each Course Topic assessment

Common Career Paths:

Recommended Study Time: Minimum of an hour personal daily study time during week days and 5 - 6 hours intensive training during weekend

Program Duration: 12–16 weeks

Who Can Attend?

This program is designed for:

- Aspiring software developers
- Students interested in web and app development careers
- Professionals seeking to transition into software engineering

Pre-requisites

- Basic knowledge of HTML, CSS, and JavaScript

Detailed Course Overview & Topics

- **Module 1: Frontend with React.js:** Solidify your React.js skills with hands-on labs and projects.
- **Module 2: Next.js for Production:** Learn to use Next.js for server-side rendering, static site generation, and routing.
- **Module 3: Backend with Node.js & Express.js:** Build a backend server using Node.js and Express.js to handle requests and manage data.
- **Module 4: Database Management with MongoDB:** Learn to design and interact with a NoSQL database like MongoDB.
- **Module 5: Building a Fullstack Application:** Connect your Next.js frontend with your Node.js backend and MongoDB database to create a fully functional web app.
- **Module 6: Authentication & Security:** Implement user authentication and authorization to secure your application.
- **Module 7: Deployment & Maintenance:** Learn how to deploy your fullstack application to a cloud provider like Vercel or Heroku.
- **Module 8: Capstone Project:** Develop a complete, production-ready fullstack application, such as a social media platform or a content management system.

On Completion of this Course, You'll Walk Away With:

1

Participants will acquire the skills to develop and deploy modern, fullstack web applications using ReactJS, NextJS, and NodeJS

2

Ability to secure web applications
