

Learn Citaville Institute - Brochure

Generative AI Fundamentals for Business

About the Course Program

Generative AI is revolutionizing industries with its ability to create text, images, and solutions. This program introduces learners to foundational AI concepts, prompt engineering, and practical applications using tools like ChatGPT, MidJourney, and custom AI APIs.

Delivery: Virtual workshops with real-world labs

Certification Requirement: Internal Learn Citaville certificate

Career Paths: AI Product Manager, Prompt Engineer, Data Scientist, Innovation Consultant

Program Duration: 4 weeks

Who Can Attend?

This program is designed for:

- Professionals seeking AI literacy
- Developers and data professionals
- Business leaders exploring AI-driven transformation

Pre-requisites

- Basic computer literacy
- No prior AI experience required

Detailed Course Overview & Topics

- **Module 1: Introduction to Generative AI:** Understand what Generative AI is and how it differs from traditional AI.
- **Module 2: Models & Tools:** Learn about different types of Generative AI models (e.g., LLMs, GANs) and the tools used to interact with them.
- **Module 3: Business Applications:** Explore practical use cases for Generative AI in business, such as content creation, automation, and data augmentation.
- **Module 4: Project:** Complete a hands-on project to generate business content or analyze a dataset using a Generative AI tool.

On Completion of this Course, You'll Walk Away With:

1

Practical ability to create AI-driven content

2

Skills in prompt engineering and AI integration

3

Awareness of ethical concerns in generative AI

4

Certificate from **Learn Citaville Institute**
