

Learn Citaville Institute - Brochure

Generative AI, Vibe Coding & ML Fundamentals

About the Course Program

This course introduces the fundamentals of Generative AI, Vibe Coding, and Machine Learning. Learners will understand how generative models work, how vibe coding applies AI for creative problem-solving, and the basics of machine learning algorithms. The course combines theory with practical exercises, preparing participants for future AI-driven innovations.

Delivery: Virtual (100% online, instructor-led, project-based) — learn at your own pace

Certification Requirement: Completion of projects and minimum attendance. Earn a minimum passing grade of 70% in each Course Topic assessment

Common Career Paths:

Recommended Study Time: Minimum of an hour personal daily study time during week days and 5 - 6 hours intensive training during weekend

Program Duration: 6 weeks

Who Can Attend?

This program is designed for:

- Students and professionals interested in AI and machine learning
- Developers exploring emerging AI tools and frameworks
- Business leaders seeking to understand AI's impact on innovation

Pre-requisites

- Basic knowledge of computers
- Prior exposure to programming is useful but not required

Detailed Course Overview & Topics

- **Module 1: Introduction to Generative AI & Machine Learning:** Understand the core concepts of these fields.
- **Module 2: Vibe Coding:** Learn about vibe coding and its application in creating immersive experiences.
- **Module 3: Models & Tools:** Get hands-on with different models and tools used in generative AI and machine learning.
- **Module 4: Practical Application:** Work on projects that combine your skills to create new content and solve problems.

On Completion of this Course, You'll Walk Away With:

1

Participants will gain a foundational understanding of **generative AI and machine learning**, along with the ability to use vibe coding to **enhance productivity and creativity**.

2

Certificate from **Learn Citaville Institute**

3

Foundations to build **creative, AI-driven** experiences and a portfolio piece
