Network Administration

About the Course Program

This course provides the knowledge and skills required to manage, configure, and secure computer networks. Learners will explore network topologies, protocols, hardware, and troubleshooting methods to ensure reliable connectivity.

Delivery: Virtual (100% online, instructor-led, project-based) — learn at your own pace

Certification Requirement: Completion of projects and minimum attendance. Earn a minimum passing grade of 70% in each Course Topic assessment

Common Career Paths:

Recommended Study Time: Minimum of an hour personal daily study time during week days and 5 - 6 hours intensive training during weekend

Program Duration: 4–8 weeks

Who Can Attend?

This program is designed for:

- Aspiring network administrators
- IT professionals managing business networks
- Students seeking careers in networking or systems administration

Pre-requisites

- Basic computer knowledge
- Familiarity with operating systems

Detailed Course Overview & Topics

- **Module 1: Introduction to Networking:** A hands-on approach to understanding network types, hardware, and cable types.
- **Module 2: TCP/IP and Network Protocols:** Get hands-on with basic TCP/IP concepts and learn about various network protocols and ports.
- **Module 3: Network Security:** Learn how to configure network security settings and protect networks from threats.
- **Module 4: Network Troubleshooting:** Gain practical skills in diagnosing connectivity problems and resolving network performance issues.
- **Module 5: Practical Project - Setting Up a Small Office/Home Office (SOHO) Network:** Configure a router, implement security measures, and troubleshoot the SOHO network.

On Completion of this Course, You'll Walk Away With:

1

Participants will be able to configure, manage, and troubleshoot computer networks in business and organizational environments.

2

Certificate of completion from **Learn Citaville Institute**
