

Learn Citaville Institute - Brochure

Product Design (UI/UX)

About the Course Program

UI/UX Design training blends creativity and usability to equip learners with the skills to create engaging digital experiences. Learners explore design principles, wireframing, prototyping, and user testing with industry tools like Figma and Adobe XD.

Delivery: Virtual (100% online, instructor-led, project-based) — learn at your own pace, design workshops, and projects

Certification Requirement: Completion of projects and minimum attendance. Earn a minimum passing grade of 70% in each Course Topic assessment

Career Paths: UI/UX Designer, Product Designer, Interaction Designer, Visual Designer

Recommended Study Time: Minimum of an hour personal daily study time during week days and 5 - 6 hours intensive training during weekend

Program Duration: 4 - 8 weeks

Who Can Attend?

This program is designed for:

- Creatives interested in digital design

- Developers and product managers exploring design
- Students transitioning into tech design roles

Pre-requisites

- Basic computer literacy
- Graphic design knowledge is a plus

Detailed Course Overview & Topics

- **Module 1: Introduction to UI/UX Design:** Learn the difference between user interface (UI) and user experience (UX) and the core principles of UI design.
- **Module 2: User Research & Personas:** Get hands-on with conducting user research, creating user personas, and understanding user needs.
- **Module 3: Design Thinking:** Learn about the stages of the product development life cycle and the five phases of design thinking.
- **Module 4: Wireframing & Prototyping:** Practice creating site maps, user flows, and interactive prototypes.
- **Module 5: Visual Design & Figma:** Explore color theory, typography, and visual hierarchy. Get hands-on with Figma to set up grids, components, and create a design system.
- **Module 6: Usability Testing:** Learn to conduct usability tests and iterate designs based on user feedback.
- **Module 7: Capstone Project:** Work on a case study project to design a mobile app or redesign an existing website.

On Completion of this Course, You'll Walk Away With:

1

Proficiency in UI/UX design tools

2

A portfolio of design prototypes

3

Practical knowledge of user-centered design
